**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Claims 1-8 in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the claims are closely related and is not unduly burdensome to examine but this is not found persuasive because the claims as grouped are distinct, for example, Claim 1 drawn to an apparatus requires a "robot" but this feature is not required in all the other independent claims, for example Claim 16, Claim 21 and Claim 24, these claims not being limited to the inclusion of a "robot" require a broader and different search is more burdensome.

The requirement is still deemed proper and is therefore made FINAL.

Claims 9 to 26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 4

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1742

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 to 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over European patent No.1 050 353 in view of Garza-Ondarza et al (US 6,073,678) The European patent discloses an apparatus comprising a heat-insulating crucible for holding molten metal, a semi-solidified metal-producing mechanism provided with a vessel for molten metal and a forming apparatus (Abstract) and a robot but does not disclose a plurality of sets but Garza-Ondarza et al discloses a plurality of mold paths including a plurality of robots (col.7, lines 18 to 41) it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a plurality of sets of the European patent apparatus in order to permit minimization of the number of robot equipment and to increase aggregate productivity.
